INVEX Accounting

About Us

INVEX Accounting is an outsourcing accounting firm in the UAE and India that works for businesses that outsource bookkeeping services. We have been a leader in comprehensive business services for years, working with clients from around the globe. Outsourced bookkeepers provide on-demand, full-time, and part-time services. Outsourcing accounting work can be an effective solution to solving staffing issues and expanding your business. Invex believes that even routine accounting and bookkeeping functions deserve special treatment. Our team aims to reduce the burden of non-core accounting functions by outsourcing them efficiently and profitably.

Unlike other accounting outsourcing providers, we offer ultimate flexibility. Using your procedures, Invex can work for you. The client can communicate directly with the outsourced accountant to maintain complete control. The trust and faith that our clients have in us mean everything to us. Our success is defined by the quality of the relationships we build during the journey and the positive changes we make in their businesses.

Introduction

INVEX Accounting is a progressive consulting firm providing outsourcing, accounting, book-keeping, and, tax consulting services for all types of organizations. We offer industry-specific services to our clients understanding their needs carefully to reach the best suitable solutions. Our professional approach ensures reliable, independent, and transparent services with the utmost confidentiality of information.

Invex Accounting is a one-stop source for all your requirements related to outsourcing and accounting. Invex's mission is to liberate businesses from day-to-day accounting and finance hassles by partnering with them to provide a one-stop solution to all their requirements. Our services ensure that your company's records comply with international accounting standards. Invex strive for high professional standards and uncompromising quality of work to give client satisfaction so that clients will be able to see their financial records with the benefit of clarity and unbiased analysis, expose possible fraud, reveal financial irregularities, and truly come face-to-face with the heart and soul of their business.

Mission

- Inventory Management
- Financial Statements & Reports
- Cash Flow / Budgeting
- Projects and Job Costing
- Online Store Bookkeeping
- Periodic Tax Filing
- New Business Set up Accounting
- Accounting Software Installation
- Management Reporting

Payroll Processing Services

Administering payroll is vital for a business. Inaccuracy in calculating payroll taxes or improper payroll deductions can be costly for companies.

Invex Accounting is an emerging accounting firm that provides financial services to individuals and enterprises across the globe. From validating data inputs to preparing salary sheets and assisting with interim payroll audits, our services are customized based on their nature and other vital aspects of your operations. This helps us minimize your risks and maximize your profits.

Payroll can feel like an overwhelming task, particularly for those business owners who pay employees for the first time, and for those who wonder exactly how payroll works. It can also tie up valuable company resources, taking hours and occupying employees who could otherwise direct their efforts to other company businesses.

A growing number of companies choose to outsource payroll processing activities to an external service provider, because:

- A routine business process that inevitably accompanies any company's operations, but it is not essential.
- There is no profit from this activity.
- Investment in resources, such as computers and software, reliable data warehouses, and trained personnel, is essential when there is a large team of employees.
- Error risk is high, but outsourcing transfers responsibility to the contractor.
- It is difficult to enforce confidentiality when the information is processed internally.

CFO Services

Outsourced CFO companies provide as-needed, part-time, or short-term CFO services to businesses. Since the pandemic, demand for specialized services called CFO advisory, CFO consulting, or CFO services has grown even faster. In today's scenario, entrepreneurs face competitive challenges and regulatory demands that affect cash flow and profitability. At some point, entrepreneurs realize that too much of their time is spent focusing on these issues. It creates an atmosphere of stress and the whole work system is affected. At this point in your business, you need to consider CFO services and retaining an affordable, interim CFO. The challenges of managing a startup or a growing business or any business are extraordinary! We will take this stress off you & you can refocus on operating and growing your business. Business finances, compliance, corporate governance, and strategic requirements cannot be neglected. Your current bookkeeping and controller staff are overseen to ensure all procedures are checked and balanced for security and accuracy.

Tax Compliances

Tax planning is the analysis of a financial condition or plans to ensure that all aspects work together to guarantee that you pay the least amount of taxes feasible. Tax planning should be a crucial component of every individual's financial plan.

The amount of time you invest in organizing your tax documents can considerably lower the chances of dealing with accounting errors while filing tax returns. However, effective tax filing is a prolonged and strenuous process.

With firms across the world investing in multinational companies, you must be updated with international taxation and regulatory policies. Invex Accounting helps you aim to become global and navigate cross-border taxes. Our experts will simplify corporate tax and regulatory frameworks to make it easier for you to do business in any part of the world. We help you manage the complexities of multiple tax systems and cross-border challenges and provide advice on various legal matters. Invex Accounting will ensure that you are never caught in a rule violation.

Business Process Outsourcing

There are numerous advantages to BPO. One of the primary advantages is that it lowers costs. Performing a certain job function internally costs a specific amount. BPO can reduce these costs by outsourcing this job to an external party, often in a less cost-intensive country, reducing the overall cost of performing that job function.

Other advantages include a company being able to focus on core business functions that are critical to its success. This is in contrast to administrative tasks or other aspects of running a company that are not critical. BPO also helps with growth, particularly in global expansion. If a company is interested in opening an overseas branch or operating overseas, utilizing a BPO company that has experience in the local industry and that speaks the language is extremely beneficial.

Knowledge Process Outsourcing

Knowledge process outsourcing (KPO) is the practice of entrusting contractors with information-related business activities. These contractors are typically freelance individuals with highly specialized knowledge in a particular area. This makes them more qualified to understand and apply the data collected.

KPO is focused on providing a specialized knowledge set along with its services. You're choosing between firms with highly efficient processes without experts versus firms with specialists.

These outsourcing facilities are located all over the world. For businesses in countries with stronger currencies, this can be very cost-effective. But it also presents remote work challenges.

Financial Reporting & MIS

These reports reflect the financial standing of your business at a specific point in time. They show the overall picture of how your company is performing but don't give you a real insight into the specifics of your operations. They look backward and don't tell you how the business might perform next month or next quarter. Instead of an overall evaluation of the company, management reporting is focused on segments of the business. By segmenting, you can get into the details and analyze the drivers of your business.

Our Team

Our teams of dedicated professionals led by senior qualified chartered accountants are obliged to give you quality services that will enable you to serve your clients better and thereby improve your business. We together with our associates in various locations of UAE and other countries enable us to give you the best in the industry.
